

Guidelines for Contributors - LabTalk and Let's Find Out

LabTalk and Lets Find Out are the publications of the Science Teachers' Association of Victoria Inc. (STAV). LabTalk is produced for secondary school science teachers, and Lets Find Out is produced for teachers in primary schools. Publications are sent to members and to subscribing institutions, including secondary and primary schools, tertiary education faculties and university and public libraries.

What topics do the Journals contain?

Articles published in LabTalk and Let's Find Out (LFO) can include anything which might be of interest to secondary school science teachers or primary school teachers, respectively. Within that general principle, articles should not conflict with the goals of the Association and the editors have discretion as to what is published.

What type of articles are published in LabTalk and Let's Find Out?

Typical examples of articles published:

- Material directly applicable to classroom teaching eg. worksheets, classroom management strategies, information on how to use software
- Material useful in preparing school curriculum eg. discussion of curriculum frameworks such as VELS or Australian Curriculum, or ideas for excursion sites
- Material relevant to running a science department eg. managing safety issues or laboratory design
- Material relevant to broad understanding of science education eg. summaries of research in learning in science or recent significant science education research
- Material developing knowledge of science & technology eg. new scientific findings, innovative technology or the history of a scientific discovery
- Material reflecting on the interaction of science, society and education eg. the political use and abuse of science, science in different social settings and the place of science in our culture

This list is not intended to be exhaustive. Keep in mind the basic principle: anything which might be of interest to our readers. Articles with an obvious commercial slant will not be considered for publication.

How long can an article be?

Articles vary in length. Ideally, STAV publishes pieces ranging from 1 to 4 pages (ie 600-2400 words). Longer pieces may be considered and may possibly be printed in sections over successive issues.

What information is included with published articles?

We include with each article:

- Author's name
- Workplace affiliation
- Brief biographical note (100 words or less)
- Thumbnail photo (preferred but optional)

How are articles for STAV Journals submitted?

Submit your completed article(s) to:

LabTalk (secondary)

LabTalk Editor
Email: projects@stav.vic.edu.au
Ph: (03) 9385 3901

Your article will be reviewed and you will receive written notification if STAV wishes to publish your article. If the article is not suitable, we will endeavour to assist you in making the appropriate changes for publication.

Let's Find Out (primary)

Barb Brook, Let's Find Out Editor

You can email or send articles for either Journal to:

Publications Officer
Email: publications@stav.vic.edu.au
or Mail to: STAV
PO Box 109
COBURG VIC 3058
Ph: (03) 9385 3999

Once your article is published, you will receive a printed copy of LabTalk or Let's Find Out.
